

## **Dr. Ted Scott**

After graduating Yale College summa cum laude in 1993, Dr. Scott received a scholarship for graduate study at Oxford. He subsequently attended medical school at the University of California at San Francisco and completed residency at Stanford, where he served as chief resident. In 2007 he began his present job as the attending physiatrist at the Palo Alto VA Polytrauma Rehabilitation Center. In addition to attending the inpatient ward, his outpatient work includes interventional spasticity clinic and electromyography. He is boarded in both electromyography and PM&R and serves as Clinical Assistant Professor at the Stanford School of Medicine. His clinical work includes rehabilitation of combat and civilian brain injury, polytrauma, amputation, burn, spinal cord and nerve injuries.
